Software engineer | web developer

## PERSONAL DETAILS

Uzbekistan ,Andijon city, baliqchi District , Islomobod MFY, Yangiobod street, 131.  
khamidov.ko@gmail.com, +998 (33) 303 82-82

## EDUCATION

Web Development

Feb 2023 – Feb 2024

IT park, Chinobod

I first started programming courses in 2022, but for some reasons, I dropped out after two months. Then, on February 23, 2023, I began learning frontend development at Web King Education Center. After studying diligently for one year, I completed the course on February 23, 2024. During that time, I became familiar with JavaScript, React.js, and many helpful npm libraries. I kept asking myself, "Can I build something that really matters?" The answer was interesting: "Yeah, if I had someone to build the backend!" But that wasn't my preferred way of working—I wanted to do it myself. That's when I realized I needed to learn backend development.

## EMPLOYMENT

Back-end Developer

Dec 2024 – Mar 2025

MeneMarket.uz, | remote working

I worked as a back-end developer in ecommerce website named "Menemarket uz". As a Back-end developer I designed and structured server side of menemarket.uz, me and my partner spent 4 month for this project and after we Deployed it to production in march of 2025. This site was perfect chance to show my skills of back-end development and I did my best to put it into production. We build this website with complex tasks at background but with simple and elegance UI to improve user experience.
